DETAILED ACTION

1. Claims 13-14 have been canceled.

Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 12, line 3 the phrase "in particular..." is deemed to render the scope of the claim indefinite. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949).

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-5, and 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hall. Hall discloses a manual grinding tool comprising substantially all of the subject matter set forth in Applicant's claims above. Note rotating grinding head(24), and guide device(12) for maintaining a fixed angle with respect to the workpiece. The use of a conventional gear reduction unit to allow the operator to set the speed of the tool for use in different grinding situations, would have been an obvious matter of design choice to those of ordinary skill in the art.

4. Claims 1, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kolling. Kolling discloses a manual grinding tool having a concentric guide device for guiding the tool across the work, comprising substantially all of the subject matter of Applicant's claims above. The use of a second auxiliary handle on the housing of the drill in the device of Kolling to help the operator in guiding the tool by allowing the operator to use both hands for stability, would have been an obvious matter of design choice to those of ordinary skill in the art.

5. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claim 12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

7. Applicant's arguments filed August 4, 2008 have been fully considered but they are not persuasive. Applicant's new limitation in claim 1 of the grinding head acting as a single material removing tool which assumes a fixed position in relation to a motor and

gear unit having a housing with two handles" is deemed to be obvious over Hall or Kolling. In Hall a pair of handles is shown and the material removal tool is fixed with respect to the motor. The use of a conventional gear reducer to change the rotational speed of the tool, is considered to be obvious to those of ordinary skill in the art. With regard to Kolling, the use of a second auxiliary handle on the drill is old and well known in the drill art, and it's use in Kolling to help the operator in guiding the tool by allowing the operator to use both hands for stability, would have been obvious.

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
